

LateX Ortho

Thicker glove for more protection*

- Made with natural rubber latex
- 50 years of self-manufacturing expertise
- Smooth finish for tactile sensitivity
- Easy donning due to water-based hydrogel coating
- Interlocking, beaded cuff design reduces roll-down
- Anatomical fit and natural movement due to proprietary hand mold with an independent thumb design

The Protexis™ Latex Ortho Surgical Glove is a latex solution that helps the user feel secure in procedures where a thicker barrier* may be desired, such as orthopedic procedures, trauma or reconstructive surgery.

A distinctive hydrogel coating eases donning while enhancing the second-skin comfort of latex.* These gloves can be worn alone when a single layer of protection is preferred or as a top or bottom glove when double-gloving.

Meets all relevant FDA and ASTM standards, including those for physical dimensions,† physical properties‡ and freedom from holes.‡ Documentation available upon request.
